# RTM

standard middleware for robots.

It made by AIST.
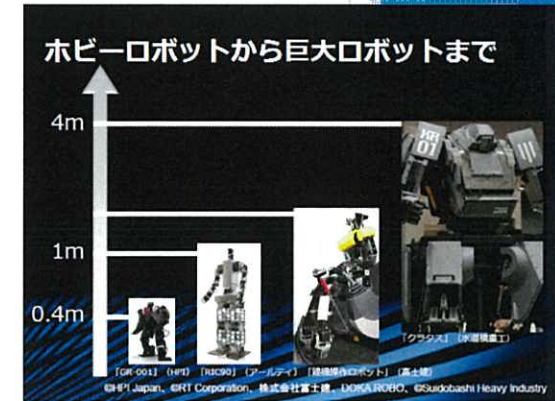

It doesn't open source.

V-Sido

It can be controlled for real time.

It works on almost robots.

DRC champion robot with us !

Summary of report

①We can make robots lower cost and short time.

②Anyone can participate in development in future.

Ex.JSON code

③We share our date for better system.

We can't do job become robots job.

It works for Fukushima and more place.

We made the rescue robot .

Thank you for listening our presentation
