

# **Group 7**

## **Service use Robots in Singapore**

Theme 2 (2): Relation between applications of robots and their performance

### **National Junior College**

Speakers: Deon Lee Jie Hui; Ng Ming Hui Victoria; Leong Jing, Wesley

Members: Loy Xing Jun; Dhivya Ramnarayan; Laura Ang Min-Sze, Isa Hanzalah Bin Abdul Ghani; Nur Sabrina Binte Mohd Rizal; Jacqueline Tan Wan Yu; Chen Jia Jia; Leong Xin Wei Abigail, Toh Kai Xuan Megan

Teachers: Ee Xing Jian, Colin; Lee Shan Shan

# Robots...

Are Autonomous

Have Artificial Intelligence

Execute Tasks with Precision

## スライド 2

---

- 1      **change imge to flow w sentence**  
Drunken Koala, 2017/11/30
- 4      **are autonomous**  
Wesley Leong, 2017/11/30
- 3      **change has to have**  
Wesley Leong, 2017/11/30
- 5      **executes to execute**  
Wesley Leong, 2017/11/30
- 1      **change to 'execute'**  
Wesley Leong, 2017/12/02
- 2      **change 'executes' to 'execute'**  
Wesley Leong, 2017/12/02

# The Service Sector

Assist humans

Cater to their needs

change to 'assist humans'

Wesley Leong, 2017/11/30

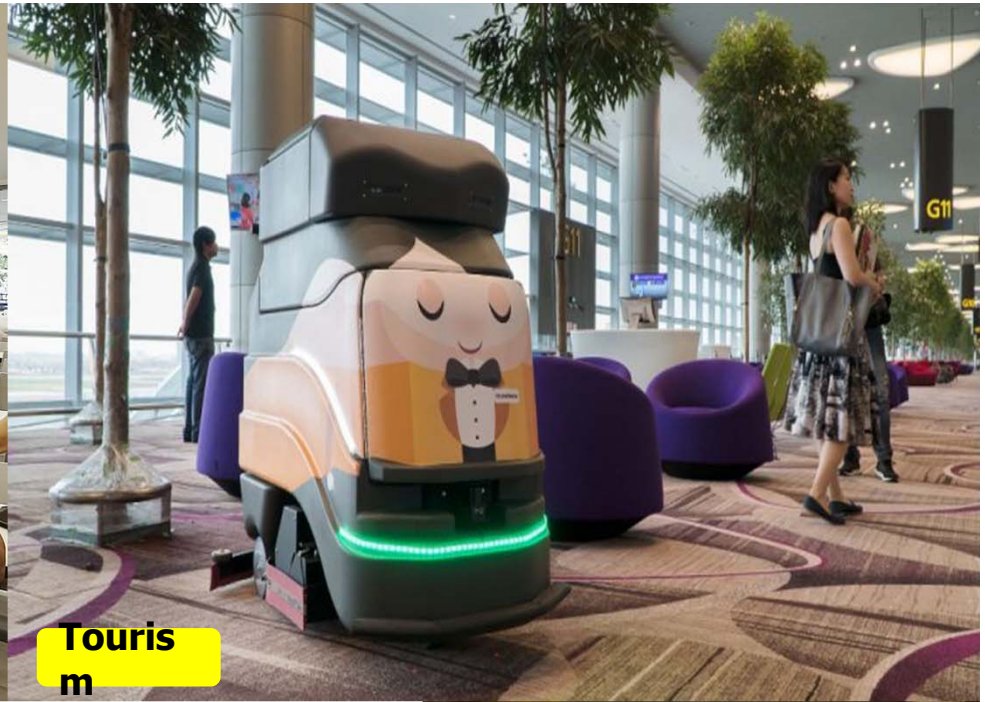

# Singapore

A Smart Nation

**Food and Beverage**

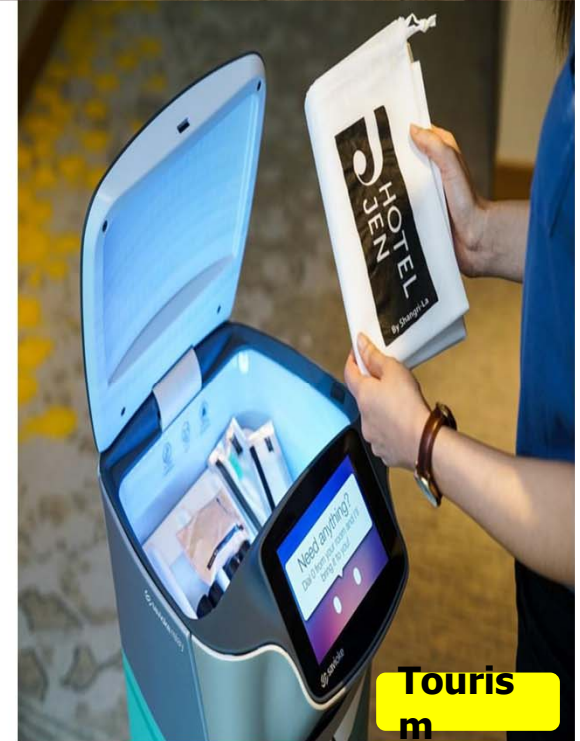

**Tourism**

**Healthcare**

# Service Robots in Singapore

**Tourism**

# Do people know about robots?

# What do People Want

# Sectors

## Food and Beverage

# Challenge

# Solution: *Smart Tray Return Robot*

## What does it do?

- Brings the tray return station to customers
- Assists customers and cleaners

# Features

Speaks short sentences

Senses its capacity

Detects obstacles to prevent collisions

# Impact of use of robots

## While...

- Increased convenience for customers to return trays
- It can sense obstacles in close proximity
- Decrease workload of cleaners, allowing them to focus on other cleaning tasks

## But...

- Cannot change the customers habit
- It cannot reroute
- Limited capacity

# Insights from IREX

## What?

TeraRanger

## What does it do?

- Sense obstacles as far as 60m away
- Plan the most ideal path to avoid obstacles.

# Insights from IREX

## What?

Amy

## What does it do?

- Assists customers and waiters
- Allows customers to order food
- Delivers food

# Insights from IREX

## What?

Dishwasher robot  
(Ritsumeikan University)

## What does it do?

- Uses camera sensor to detect thickness and position of dishware
- Tips of grasping mechanism can pick up utensils.

# *State of the Art*

## **What?**

Robotic Kitchen  
(Moley's Kitchen)

## **What does it do?**

- Records human actions in 3D; replicates the movements to prepare meals.
- Cleans the kitchen after cooking.

# In the near future..

*Hawker Food*

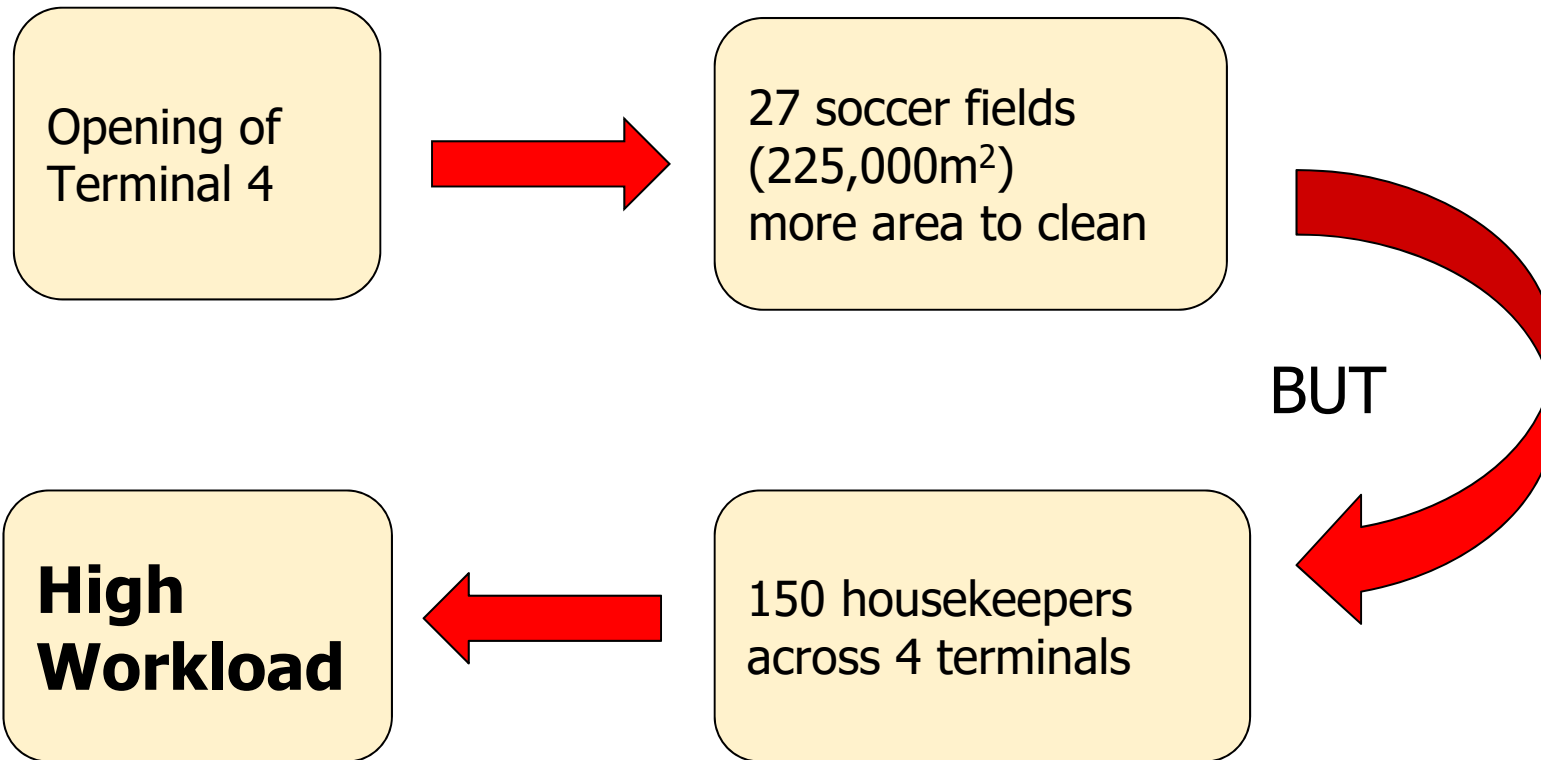

*"Best Airport in The World"*

# Context

**Solution:** *Automated Cleaning Robot  
(Neo)*

**What does it do?**

- Sweeps, vacuums and mops the floor
- Assists human housekeepers in keeping the airport clean.

# Features

Integrated collision avoidance technology, 3-D cameras, lasers

Real time connection

3-in-1 :  
sweep,  
vacuum, mop

5 hours  
continuous  
run time

# Advantages of robots compared to human housekeepers

<b>Robot Housekeepers</b>	<b>Human Housekeepers</b>
Can be programmed to clean all areas	May miss out certain spots while cleaning
Works faster	Works slower
More working hours	Less working hours

# Impact of use of robots

## While...

- Long-term savings due to decrease in demand for housekeepers
- Increase in job opportunities for older workforce

## But...

- High initial cost of implementation (~USD 60, 000)
- Loss of housekeeping jobs for the younger workforce

# *State of the Art*

## What?

Knightscope (K1, K3, K5, K7)

## What does it do?

- Patrols and guards designated areas autonomously
- Scans car license plates and recognise faces.

# Insights from IREX

## What?

Sanbot Elf

## What does it do?

- Patrols and guards designated areas autonomously
- Has facial recognition and voice localization to detect suspicious people

# In the Near Future...

Thank You!

ご清聴ありがとうございました。
